

THE FIRE

DEPARTMENT'S TALLEST

LADDER REACHES

7 FLOORS.

UNFORTUNATELY YOU

LIVE ON THE 23RD.

A fire in a high rise building is particularly dangerous. It can cut you off from escaping down the stairs, and fire ladders can only reach to the tenth floor. If there is a fire, you are out of options.

But today you do have an option, you can have fire sprinklers installed in your building. 8 out of 10 fire deaths occur in residences. Smoke alarms alert you to a fire, but only fire sprinklers can control a fire, and often extinguish it in less time than it takes for the fire department to arrive at the scene.

Retrofitting high rise buildings costs on average only \$2.50 a foot and can save thousands of dollars in insurance costs.

To find out more about the life-saving benefits of fire sprinklers, call NIFSAB toll-free at 1-866-264-3722, and for more information visit www.firesprinklerassoc.org.
