

ARE YOU READY

to begin Fire Sprinkler Testing in January 2017?

Ensure code and ISO compliance by sending notices to building owners. A third-party inspection company can help you carry out your fire sprinkler testing program.

Regular Fire Sprinkler Testing is Required by the International Fire Code, State Code & Chicago Code

Chapter 9, Fire Protection Systems of the 2015 International Fire Code requires water based fire protection systems to be inspected, tested and maintained at regular intervals in accordance with NFPA 25: Standard for the Inspection, Testing and Maintenance of Water-Based Fire Protection Systems.

Regular testing is also required through the Illinois Office of the State Fire Marshal's adoption of NFPA 101: Life Safety Code, Section 9.75 (2000 edition). All automatic fire sprinkler systems, standpipe systems and fire pumps must be inspected and maintained in accordance with NFPA 25.

Illinois state law, 225ILCS 317/15 (h), requires a copy of all fire sprinkler system inspection reports to be submitted to local fire officials having jurisdiction. Also, all inspectors are required to be NICET II certified or trained through an approved apprentice program.

Are you checking these items before work begins? Stop any job violating this state law and/or call the state fire marshal.
