

SIDE-BY-SIDE BURN DEMO UNITS: SHOW THE DIFFERENCE.

Display the dramatic difference between flashover and the quick response of residential fire sprinklers. The Northern Illinois Fire Sprinkler Advisory Board (NIFSAB) offers side-by-side burn demonstration units for use by fire and public information officials. They're a good fit for large community events, fire department open houses, and more. NIFSAB provides the units and supplies, while fire departments are asked to provide furniture.

The Lake County Fire Chiefs Association also provides a roll-off side-by-side unit for its members.

Please take photos during the event and submit them to Erik Hoffer at erik@nifsab.org with event details.

Conventional Side-by-Side Units

Two, 10-panel rooms assembled on site.

Who to Contact: Erik Hoffer
(708) 403-4468, erik@nifsab.org

Side-by-Side Trailer

Mobile trailer is best fit for events where demo needs to be moved immediately after event (such as street fairs).
